Source Document: [AlphaXML] [AlphaXML] [AlphaXML]

Select Target Document Type Definition (DTD)

DTD URL: [] Load

The Document Type Definition defines the elements and attributes that an XML output may contain. The Transform definition will convert from the XML format output by an AlphaXML document into any other valid DTD.

DTDs for major XML formats (including cXML, HTML, and WML) are available on the internet.

Please choose the DTD for your output from the drop down list, or enter a new URL that points to a valid DTD, then click on the Load button.
